# WINE EMOTION

Using the very latest state of the art technology – the Wine Emotion machine uses argon gas to form a layer on top of the wine once it has opened and this enables the wine to remain in the very best of condition for at least 30 days once it has been opened.

This means we can offer a range of the super premium wines. The machine also has a climate controlled environment which ensures the wines remain at exactly the correct temperature to be drunk at any time of the day.
